danielq1603@gmail.com · Open to relocation

Summary

Founding AI Product Builder. 9 years full-stack engineering + 6 years production AI. Co-founder CEO/CPO at TNG Shopper (top-100 retail-tech 2025); built and led a 7-node multi-agent system serving 11 enterprise customers across 5 countries. \$500K raised, \$1.53M Contracted ARR. Open-source: Antigravity-OS governance kernel (PyPI: ag-os), agent-dag-pipeline, gemma4-vllm-deployment, WP-Multisite, Atelier (active sprint to Google AI Agents Challenge 2026-06-03). 5 zero-to-one AI products in 9 years.

Highlights

TNG production multi-agent system — fail-closed agent fleet for 11 paying enterprise customers across 5 countries. **~73.5M operations per month, 68.9% O-R-A-V pass-by-design.** manzela.github.io/pipeline-observatory · Google ADK + Vertex AI + Gemma 4 MoE + vLLM + Langfuse + OPA.

Antigravity-OS — open-source governance kernel for AI agents (9-rule Constitution, Cost Guard, Flight Recorder, Self-Healing CI, Dreaming Module, MCP server). pypi.org/project/ag-os · MIT-licensed v1.4.0 (2026-05-08).

Antigravity-OS — open-source governance kernel for AI agents (9-rule Constitution, MCP server, Dreaming Module). Shipped to PyPI as ag-os. → pypi.org/project/ag-os

Experience

TNG Shopper — Co-founder CEO / CPO + Lead Product Engineer | Jan 2024 – Present

- Built the AI-search-aware CMS layer (WordPress multisite, 234 retailer sites, llms.txt, JSON-LD, Sage 10) + customer SaaS platform (onboarding + analytics) shipped in under a month. 11 active enterprise customers across 5 countries.
- Raised **\$500K from top-tier angels**; secured **\$118K collected / \$223K Booked / \$1.53M Contracted ARR**; top-100 retail-tech 2025. Closed each of 11 enterprise contracts personally. Operated full founder spectrum (ideation → product → engineering → sales → research).

Tasko AI — AI Product Engineer | Oct 2020 – Dec 2023

- See Highlights (21M+ messages, 1,561 intents, 153 clients). Designed the four-layer topology, labeling ontology, intent taxonomy, and verification policy; built and ran the labeling team.

Selected prior experience

- **Seller App** (2020–2024, Co-founder CEO) · Camera-first retail-onboarding: 60M+ SKUs, \$10K MRR. manzela.github.io/Manzela/seller-app
- **Israeli FS** (Feb 2019 – Jul 2020, Solo Engineer) · 5-stage scraping/structuring pipeline → ~50M+ new AUM. manzela.github.io/Manzela/data-mining
- **Gigs** (2016–2019) · Web dev, inventory, automation, research. manzela.github.io/Manzela/junior-years.

Open-Source Projects

- **Antigravity-OS** (PyPI: [ag-os](#)) — see Highlights. MIT-licensed.
- **agent-dag-pipeline** — reference implementation of the multi-agent DAG pattern behind TNG's production system. Google ADK + Vertex AI + four-axis O-R-A-V evaluation + RLAIIF / DPO data flywheel; mypy-strict CI clean.
- **gemma4-vllm-deployment** — community reference for production MoE serving: forensic runbook of 20 distinct failure modes deploying Gemma 4 26B-A4B-it on Vertex AI / vLLM (128 experts, 4 active per token; 4B params per forward pass on a 26B model).
- **WP-Multisite** — sanitised blueprint of TNG's CMS / AI-search-aware infrastructure layer.
- **Atelier** — autonomous design agent that converges UI/UX to flawless across multi-axis criteria. 3-layer architecture (PIP intake → Campaign Orchestrator → 8-node atomic DAG with EvoDesign LoopAgent + 5-judge consensus). 13 novel contributions including AlphaEvolve-inspired evolutionary K-candidate search, per-project DPO judge with Hebbian mutator. Built on Google ADK 2.0 Beta + Vertex AI + Stitch MCP. **In active 3-week sprint to Google for Startups AI Agents Challenge 2026 (submission 2026-06-03).**

Upstream OSS Contributions

- anthropics/claude-code **#59401** — forensic bug report: progressive TUI text rendering corruption in long-running terminal sessions (full repro across two 25h+ sessions, frame-time metrics, environment matrix).
- NousResearch/hermes-agent **#26383** + **#26382** — feature design for coordinated emergency halt via `/panic` + hermes panic CLI with state-flush + recovery; backward-compatible.
- Agent-Field/agentfield **PR-573** — substantive review comment.
- More at github.com/Manzela.

Skills & Certifications

Languages: Python · TypeScript · PHP 8.1+

AI Frameworks & Models: Google ADK · Vertex AI · Gemini 3.1 Flash-Lite · Gemma 4 26B-A4B-it MoE · vLLM · LoRA / DPO / RLAIIF · MCP (Model Context Protocol) · constitutional AI · multi-agent orchestration

Production AI Infra: Modal serverless · Pydantic · `asyncio` · Langfuse · OpenTelemetry · Redis · OPA (policy-as-code) · GCP (Cloud Run, BigQuery, Firestore)

AI-Search-Aware Web: WordPress multisite (Sage 10, Roots/Acorn) · Cloudflare CDN · JSON-LD / Schema.org / `SpeakableSpecification` · `llms.txt` · IndexNow · AI-bot-aware `robots.txt`

Computer Vision: Barcode → Image → Video pipelines + RAG over canonical SKU catalogs

Methodology: O-R-A-V deterministic gating · fail-closed safety · Constitutional Rules (Antigravity-OS) · evaluator-optimizer loops · DPO data flywheel

Certifications: Google Cloud Generative AI Leader (active) · Google Cloud Professional Machine Learning Engineer (issuance June 2026) · Product Experts (active).
